

Dear J.P. Morgan team,

I'm excited to apply for the 2026 CIB Research & Analytics Program because I genuinely love solving complex problems and turning data into real impact. At algoleap, I built AI pipelines that cut manual video review by 70% for hundreds of cases and led modular NLP projects with 95% accuracy, showing how much I thrive on analytical challenges and delivering results that matter. My journey founding nahneed. — from taking an idea to 50+ active users in a month — taught me the value of innovation, adaptability, and working closely with people from different backgrounds to build something that lasts.

What draws me to this internship is the chance to work on financial analysis, market research, and collaborative projects at a global scale. I've honed my quantitative and research skills through hands-on experience and coursework, and I'm currently diving into the CFA/FRM curriculum to deepen my understanding of corporate finance. I'm proactive, detail-oriented, and genuinely enjoy building strong relationships — whether that's leading a tech team or working side-by-side with peers and mentors.

I'm eager to bring my technical background, creative drive, and passion for finance to J.P. Morgan's team. Thank you for considering my application — I'd love the opportunity to contribute and grow with you.

Thanking you  
Aradhye Swarup
