Subject: Application for Full Stack Developer – Eager, Quick Learner, and Team Player

Dear Hiring Team,

I'm writing to express my keen interest in the Full Stack Developer position at your Bangalore office. I recently completed a full-time internship at algoleap and am currently pursuing my BTech in CSE from VIT Vellore, with a strong passion for clean code, collaborative problem-solving, and continuous learning.

I've worked across the stack, and while my recent projects used technologies like React, FastAPI, and MongoDB, I'm excited to get hands-on with C#, .NET, Angular, and MS SQL. I love diving into new environments—at algoleap, I helped refactor critical backend modules and optimize cloud deployment pipelines. I've also led open-source AI and blockchain projects that demanded high ownership, curiosity, and team collaboration.

Your focus on team fit and the thrill of challenge resonates deeply with me. I thrive in such environments and believe I bring the right mix of energy, skill, and humility to contribute meaningfully from day one. I'm available for immediate full-time, in-office work in Jayanagar and would love the opportunity to learn from your experienced team.

Thank you for considering my application. I'm excited at the thought of building great software with you.

Warm regards,
Aradhye Swarup
